

## **Sub: Application for Reporting Analyst (Job ID: 8087) – Referred by Rashik Shahare**

Dear Hiring Team,

I am writing to apply for the position of **Reporting Analyst (Job ID: 8087)** at **EXL**, as referred by **Mr. Rashik Shahare**. I am currently pursuing an **M.Sc. in Statistics (4th Semester – fully project-based)** from **Amity University, Lucknow**, with a **CGPA of 9.33** till my 3rd semester, and I am keen to begin my professional career as a Reporting/Data Analyst.

I have a strong foundation in **Python and SQL**, along with hands-on experience in **data cleaning, reporting automation, exploratory data analysis, and dashboard creation**. Through my academic projects and internships, I have worked with real-world datasets to generate structured reports, perform statistical analysis, and support data-driven decision-making using **Python, SQL, Excel, Power BI, and Tableau**.

My background in statistics has strengthened my analytical thinking and attention to detail, which I believe are essential for a Reporting Analyst role. I am comfortable handling large datasets, writing efficient SQL queries, building Python-based analysis workflows, and presenting insights in a clear and meaningful manner to stakeholders.

I am particularly interested in this opportunity at EXL due to its strong reputation in analytics, reporting solutions, and data-led business transformation. As a motivated fresher, I am eager to learn, adapt quickly, and contribute effectively to your reporting and analytics teams.

Thank you for considering my application. I would welcome the opportunity to discuss how my skills and enthusiasm align with EXL's requirements.

Kind regards,

**Aman Kumar Singh**
